

CP 078

1K slow thinner

CP 078 Thinner is expertly crafted for 1K basecoat systems, offering the flexibility to choose the appropriate operating viscosity of paints based on the operating temperature and the scope of the repair. Particularly effective at temperatures exceeding 25°C, this thinner is designed for versatile use.

To cater to various project sizes, **CP 078** is conveniently available in 1 and 5-Litre tins, ensuring a practical solution for adjusting viscosity and achieving optimal paint performance in a range of applications.

PACKAGING	
Volume	Collective packaging
1 l	6 pcs.
5 l	4 pcs.

EFFICIENT

LONG SHELF LIFE

FOR 1K PRODUCTS

SLOW THINNER

TEMPERATURE RANGE

25-30°C

APPLICATION

- GREEN-LINE
- KAR-BON system
- SilverLine
- LS line

POT LIFE

Ready-to-use product

MINIMUM SHELF LIFE

24 months in originally sealed packaging

EVAPORATION TIME AFTER APPLICATION

It increases evaporation time for 1K products
